

THE CAREGIVER® PROFESSIONAL is a clinical-grade infrared thermometer for measurement of forehead temperature in adults, children, and infants without contact. It is designed for use in a wide variation of medical settings and can also deliver ambient/skin surface temperatures with the flick of a switch. This exciting new thermometer is rugged enough for routine office/clinic handling and still delivers professional precision you can depend upon! The CAREGIVER® thermometer offers instant, accurate temperatures and easy-to-use features that professionals have asked for:

- **PROVEN ACCURACY...** documented clinical precision in a wide range of medical settings.
- **INCREASED EFFICIENCY...** eliminates probe-cover costs and storage/transport logistics, reduces time for vital-signs, available without cart/trolley; no charger-base required, up to 15,000 temps from one set of AA batteries.
- **EASE OF USE...** simple positioning, one-button operation, improved patient cooperation, bright backlit display and 30-temperature memory recall.
- **NON-CONTACT...** delivers improved hygiene with reduced risk of cross-contamination and no probe-covers required, minimizes risk of operator error, provides immediate access to measurement site, no patient disturbance.
- **INSTANT RESULTS...** measurement in 1-2 seconds, reliable and repeatable.
- **MULTI-TASK CAPABILITY...** also measures room temp, skin/surface temp with the flick of a switch; Celsius/Fahrenheit switchable with a touch
